Current Responsibility

Maggie Alston is a principal based in New York. She joined Milliman in 2015.

Professional Work Experience

Maggie has an extensive background in healthcare data analytics. She has worked with traditional and nontraditional healthcare data sources to build population identification and bundled payment algorithms, and is an expert in developing dynamic, illustrative data models.

Maggie also has experience in developing shared risk arrangements between payers and providers and between payers and pharmaceutical companies.

Prior to joining Milliman, Maggie worked as a technical lead, developing patient identification and treatment algorithms for a population health technology start-up. Maggie also previously worked for a large medical group in compliance and patient satisfaction analytics.

Professional Designations

Maggie is a Certified Healthcare Finance Professional with the Healthcare Financial Management Association.

Education

BA, Public Policy Analysis – Biology, Scripps College
